TO: All Fire and Rescue Personnel

FROM: Charles E. Drysdale, Division Chief/Operations *CED*
Ivan T. Mote, Division Chief/Rescue *ITM*
Robert F. Kiely, MD – Medical Director *RFK*

RE: ALS ENGINE MEDICATIONS

A large portion of the medications carried by JFRD's ALS apparatus have been on back order for a great period of time. This is not a local or state issue, but a national issue. Consequently, the medications below are the only ones authorized to be carried on ALS Engine companies until this issue has been resolved:

Qty – 5	Albuterol
Qty – 2	Atrovent
Qty – 2	Epinephrine 1:10,000
Qty - 1 Bottle	Nitroglycerin SL
Qty - 1 Bottle	Aspirin 81 mg
Qty - 1	D ₅ W 250 ml

As medications are used, they will be restocked from the transporting Rescue Unit as necessary.

Thank you for your cooperation in this matter.
