

Jacksonville Fire and Rescue Department

High Rise Firefighting Seminar

Don't miss the JFRD High Rise Seminar presented by Retired Chief Matt Stuckey. Chief Stuckey was known as the Houston Fire Department "high rise guy". He served 36 years in the HFD with the last 10 years as a chief in the downtown district. For the last 23 years, Chief Stuckey has worked as a professional high rise building consultant, surveying buildings and building systems for an acclaimed high rise consulting firm. Building systems are constantly changing and that puts firefighters at an extreme disadvantage while engaging in firefighting operations. Come learn the latest information on building systems from the expert who will incorporate that knowledge with his years of high rise firefighting experience and create a unique learning experience.

Topics to be covered

- **High Rise Problems**
- **Alarm Systems and Fire Control Rooms**
- **Stairwells**
- **Extinguishing Systems**
- **Ventilation Systems**
- **Utilities and Other Hazards**
- **Communications in High Rise Buildings**
- **Early Stages of Emergency Operations**
- **Search, Rescue and Evaluation**
- **Fire Attack**
- **Incident Command in High Rises**
- **Prefire Planning Methods**

This will be a one day class spread over three days so all shifts have the opportunity to attend off-duty. The Training Bulletin will be cleared for all three days so if your company would like to attend on duty, officers can email kpowers@coj.net with your request to be placed on the bulletin.

September 19-21 2016
